README.md

Collect simple zsh commands here:

```
ls -1
```

SORT

**list files, 1 per line | reverse dictionary order | based on column 7 of
field 1 |**

```
ls -1 | sort -r -k 1.7d
```

field 1, columns 4,5 in numeric order | then columns 14,15 numeric

```
ls -1 * | sort -k 1.4,1.5n -k 1.14,1.15n
```

-k = key -d = dictionary order -n = numeric order -r = reverse order
