Code blocks are part of markdown rules. Nothing is actually run (?) 1

```
file <- "700_experimental_hightlight_blocks.md"
```

This a .md file.

Nothing is run in this file.

But different blocks render differently in final pdf.

Code blocks are part of markdown rules. Nothing is actually run (?)

```
#  this is console
ls -la
```

```
#      this is shell
ls -la
```

```
#      this is zsh
ls -la
```

```
vim:linebreak:nospell:nowrap:cul tw=78 fo=ntl foldcolumn=3 cc=+1
```
